

The background features large, stylized, light gray letters 'S' and 'A' on a black background. The 'S' is on the left and the 'A' is on the right, both partially cut off by the edges of the frame. A diagonal gray bar runs from the top left towards the bottom right, crossing through the letters.

cisal

О НАС

Фабрика Cisal являет собой образец автономной и целостной итальянской промышленности, с полным циклом производства, инновационными технологиями и методами управления. На сегодняшний день Cisal — это один из главных новаторов отрасли, уделяющий особое внимание эффективному использованию ресурсов, прежде всего — воды и электроэнергии. Кроме того, фабрика неустанно работает над развитием инноваций в дизайне, материалах, функциональности и технических характеристиках.

В ее коллекциях умело сочетаются красота, практичность и надежность, и все это — благодаря сотрудничеству со всемирно известными дизайнерами, такими как Карим Рашид, Джанпьеро Пейя, Раффаэлла Веккьи, Невио Теллатин, Марко Полетти.

1952

Основанная в 1952 году синьором Либорио Сольди и названная CISAL, компания прошла через все этапы становления отрасли смесителей, которая зарождалась именно в провинции Кузио.

1980

В 1980 году архитектор Раффаэлла Веккьи создает серию ARCANIA — классический и знаковый продукт, который открывает новые горизонты в освоении иностранных рынков. Для развития этих рынков в 1991 году был создан филиал компании в Германии.

1981

В процессе разработок под руководством Даниэле Сирини на свет появляется первый картридж с керамическими дисками для однорычажных смесителей. С новым картриджем BLITZ начинается новый успешный этап для множества коллекций Cisal.

В 1999 году на основе разработок архитектора Джанпьеро Пейа был создан новый производственный цех, оснащенный самым современным оборудованием для производства электрической и тепловой энергии, для гальванических процессов, с роботизированным складом. Здесь сконцентрированы самые передовые технологии отрасли, именно здесь происходит непрерывный процесс проектирования новых изделий, воплощения их в материале и совершенствования готовых изделий.

В 2009 году семья Хубер, владеющая фабрикой Huber, лидером в производстве термостатических смесителей, приняла стратегическое решение приобрести Císal, определив при этом единственно верное успешное направление с точки зрения технологий и промышленности — объединить ноу-хау, опыт и производственные мощности. Такое сочетание позволило предложить и проектировщикам, и потребителям разнообразную и полную гамму изделий: и термостатические смесители, и однорычажные смесители, и смесители традиционного дизайна.

В 2016 году архитектор Фабио Ротелла стал частью команды компании и в качестве арт-директора создал «CISALAtelier» — креативный центр, который путем исследований и экспериментов будет работать над созданием все более ярких и аутентичных изделий.

СОВЕРШЕНСТВО MADE IN ITALY

Cisal играет очень важную роль в истории развития итальянских смесителей.

Этой фабрике присущ неизменный интеллектуальный подход, мастерство и профессионализм. Здесь всегда принимается во внимание человек и, что немаловажно, место — ведь в районе озера Орта на протяжении нескольких поколений сконцентрировано все производство смесителей. Именно здесь живет наследие мастеров-ремесленников и сохраняется культура итальянского умения создавать шедевры.

KOHLETT
cisal *Atelier*

10

Вода — это основополагающий элемент для человека, и контроль над ее расходом был важен еще с древних времен.

Смеситель, «раздатчик» жизненно важного ресурса, который мы используем ежедневно, — это функциональное и необходимое изделие, которое, однако, легко превращается в изысканный и роскошный элемент, играющий главную роль в интерьере ванной комнаты. С самого начала своего существования компания Cisal отличалась тем, что вела постоянную работу над формой и дизайном своего широкого ассортимента. Позже, с приходом в бизнес семьи Хубер, компания Cisal поднялась на еще более высокий уровень с точки зрения качества и престижа, заявив о себе как о значимом участнике сегмента ванных комнат и кухонь на международном рынке.

В 2016 году архитектор Фабио Ротелла стал частью команды компании, и в качестве арт-директора создал «CISALAtelier» — креативный центр, который путем исследований и экспериментов будет работать над созданием все более ярких и аутентичных изделий.

«Сейчас, во время больших перемен, при все более сложных мировых тенденциях и в процессе постоянной эволюции, Cisal со своей новой стратегией намерен и дальше развивать и усиливать собственный имидж, делая его все более уникальным и узнаваемым, увеличивая долю собственных изделий и инноваций в глобальном масштабе.

Это новые материалы, новые отделки, новые детали и новые технологии, призванные контролировать потребление и сохранять воду. Cisal заявляет о себе как об итальянской компании, чтущей традиции и одновременно стоящей в авангарде отрасли; компании, нацеленной в будущее и всегда внимательно прислушивающейся к ожиданиям дизайнеров и пользователей; компании с бережным отношением к основополагающему для планеты элементу — воде».

Фабио Ротелла

Коллекция *VITA*

дизайнер Карим Рашид

karim

Природа,
энергия и
органичная
форма.

VITA

For the Vita collection
I wanted to create softer,
more friendly organic forms.
The branch or bamboo-like
shapes are contemporary yet
natural, appearing to grow
out of the sink. The tapered
neck communicates tactility
and expresses a strong visual
comfort and pleasure.

AQUA EMOTIONS

Пятьдесят лет внедрения технологических и производственных ноу-хау, сконцентрированных на самом важном и сложном компоненте смесителя — на термостате.

Один из основных европейских производителей и несомненный итальянский лидер в своем постоянно развивающемся секторе, компания HUBER — это воплощение идеального партнера для проектировщиков и профессиональных дистрибьюторов высокого класса, обладатель наиболее полного ассортимента высококачественных и прогрессивных решений для ванной комнаты.

Компания.

Пятьдесят лет внедрения технологических и производственных ноу-хау, сконцентрированных на самом важном и сложном компоненте смесителя — на термостате. Это первые ключевые тезисы, объясняющие суть компании HUBER, одного из ведущих европейских производителей и несомненного итальянского лидера в своем секторе.

Первые шаги в середине шестидесятых — знаменитый Thetamix, затем, начиная с 1987 года, ряд инноваций, и вот в анамнезе — резкий скачок с проектированием и производством первых настоящих термостатов для ванной комнаты, с дизайном и характеристиками, соответствующими современным требованиям.

Мгновенно превратившись в серьезную производственную компанию, Huber всегда придерживалась полного контроля за изделием и производственным процессом, который полностью осуществлялся на собственных мощностях.

Для постоянного совершенствования технологий и дизайна в компании работает мощная и опытная команда техников, исследователей и разработчиков.

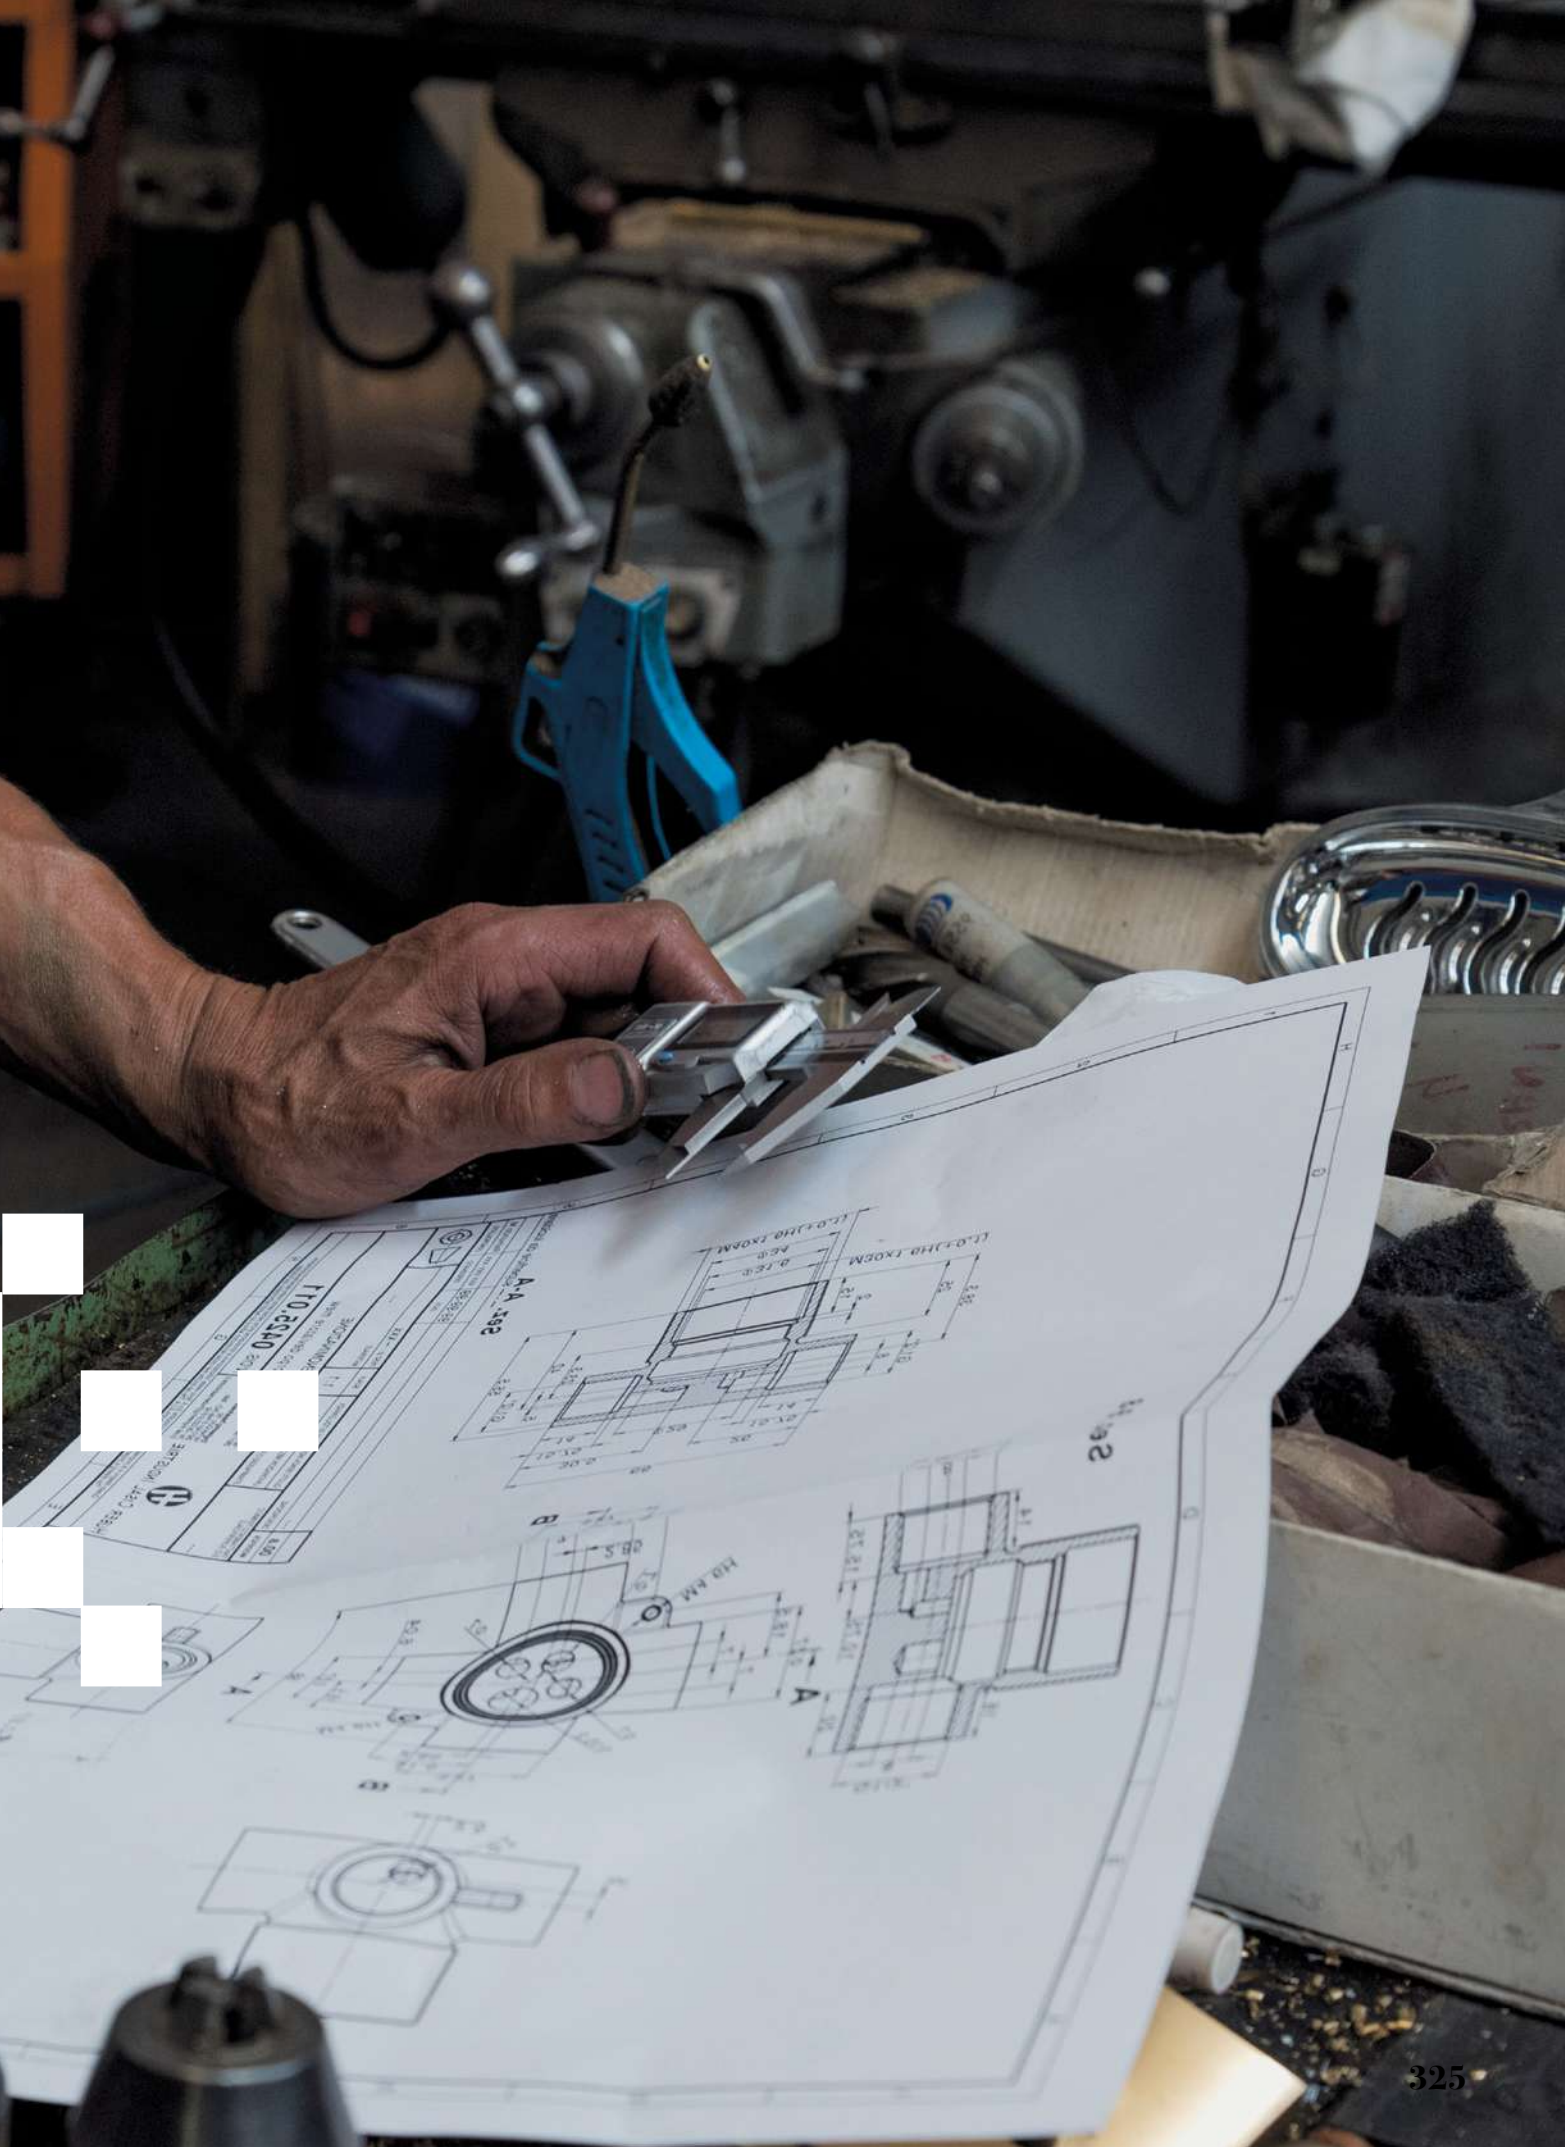

Huber находится в г. Сан-Маурицио д'Опальо, на северо-западе Италии (всего в 80 км от Милана), на берегу озера д'Орта, в самом сердце наиболее важного района, где сконцентрировано производство итальянских смесителей.

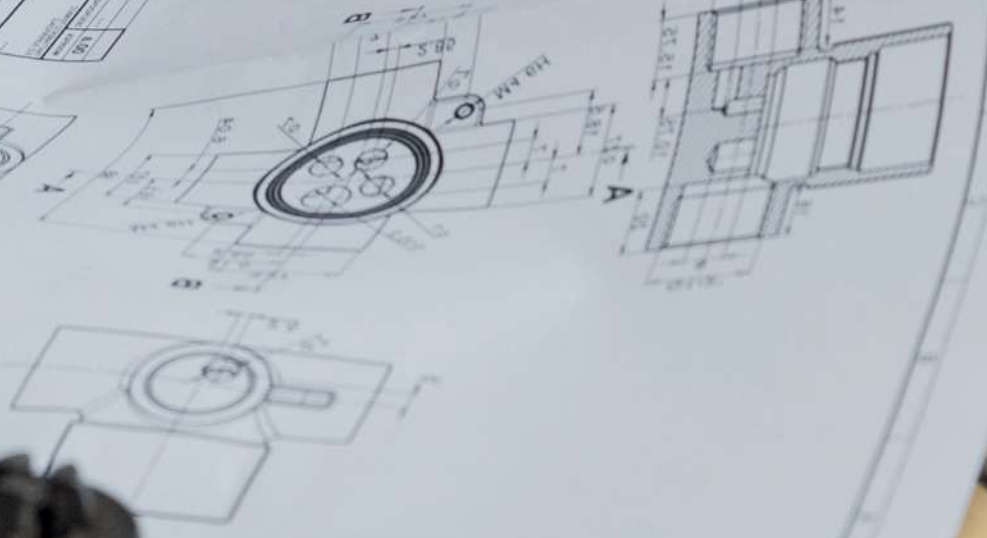

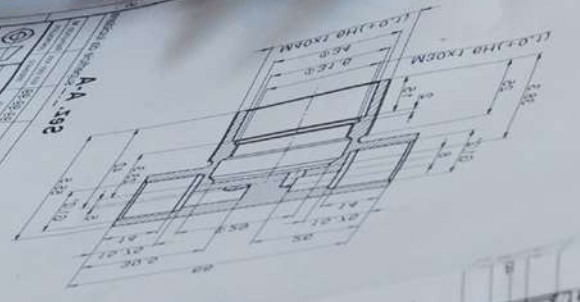

Huber lab

Для продвижения целей, созвучных с духом компании, была создана HuberLab — лаборатория креативного взаимодействия, в которой разноплановая команда техников и креативщиков соединяет опыт технологий и функциональности с творчеством и стилистическими поисками для создания инновационного подхода к промышленному дизайну.

«Предлагать новые сценарии, нацеленные на эмоциональное воздействие через современные высокоточные предметы с ярко выраженной индивидуальностью, продукты разумные и эффективные, способные обеспечить надежный и простой способ взаимодействия с водными ресурсами с уважением к планете».

CHRONOS

Когда для создания уникальных и непревзойденных характеристик высокоточная инновационная инженерия сочетается с изысканными деталями, на свет появляется промышленный шедевр. Максимальная механическая точность и совершенные детали, типичные для швейцарской часовой промышленности — вот источник вдохновения для инновационного термостата CRONOS. Благодаря революционной планетарной системе шестеренок, CHRONOS обеспечивает двойную точность при регулировке температуры. Концепция «безопасного прикосновения» и яркий оригинальный дизайн дополняют характеристику этого уникального шедевра механики.

HARLOCK

Design By Fabio Rotella

«История капитана Харлока, героя и космического пирата, который воюет не за государство и не за планеты, а только за идеалы, которые носит в своем сердце, началась давным давно, в далеком 2977 году».

Harlock — это предмет из будущего, родившийся благодаря креативности эклектичного архитектора Фабио Ротелла и ставший частью аутентичной и оригинальной ванной комнаты.

Harlock включает в себя различные смарт-элементы: четкие очертания, рычаг в современном стиле и высококачественную отделку деталей.

Конфигуратор отделок

Важная черта Harlock — его переливающаяся отделка. Система поверхностей, которые сочетаются между собой в инновационных комбинациях и миксах, предвосхищает новый тренд в мире креатива. Коллекция дополнена конфигуратором, включающим в себя специальные отделки, цвета, декоры и материалы (дерево и мрамор), который создает бесконечное множество творческих возможностей.

КУОТО

Отличающаяся оригинальным и инновационным подходом к теме линейных форм, коллекция КУОТО представляет собой вычурный, но элегантный наклоненный силуэт в современном стиле. Дополненная высококачественной отделкой и инновациями в конструктивных и функциональных решениях, коллекция КУОТО отличается естественной изысканностью плавных изгибов и лаконичностью форм.

VICTORIAN

Названная в честь славной Викторианской эпохи в Британии, эта коллекция с традиционной установкой была придумана и кропотливо воплощена в жизнь для поклонников бескомпромиссных классических традиций.

Изысканный стиль VICTORIAN подчеркивают типичные конструктивные детали, которые превращают ее в элегантное и вневременное дополнение к любой ванной комнате в классическом стиле.

Гамма изделий очень широкая, что обеспечивает современному дизайнеру множество вариантов концепции и установки на любом элементе ванной комнаты.
