Bio-sauna

La Biosauna è una sauna con livelli di temperatura contenuti tra i 50 e i 60°C e un'umidità di circa 60-70%. Grazie al vaporizzatore integrato, impostando la temperatura preferita, la stufa Bio creerà l'equilibrio perfetto fra calore ed umidità.

Il sistema combinato Effe consente la scelta tra Biosauna, un percorso a metà strada fra la sauna finlandese e la natura mediterranea del bagno di vapore, o sauna tradizionale, caratterizzata da temperature fino a 100°C con bassa umidità. Il sistema combinato può essere applicato a tutte le saune Effe.

The Bio-sauna is a sauna whose temperature ranges from 50 to 60°C with humidity between 60-70%. The built-in vaporiser allows you to set your preferred temperature and the Bio heater creates the perfect balance between heat and humidity. The combined Effe system allows you to choose between a Bio-sauna, a halfway house between the Finnish sauna and the Mediterranean nature of the steam bath, or a traditional sauna with low humidity and a temperature of up to 100°C. This combined system can be installed in all Effe saunas.
